Changes in Requirements

Decisions

Functional requirements

- Clients registration and authorization
- Request CRU operations
- Feedback gathering
- Email notifications

Technologies:

- Java
- Spring framework
- MVC
- PostgreSQL
- JQuery

Non-functional requirements

- Secured end-points
- Invalid mapping
- Session management

Defining MVP

1. What problems this product solve?

2. Who is having this problem?

3. How can we solve this problem?

Covered requirements
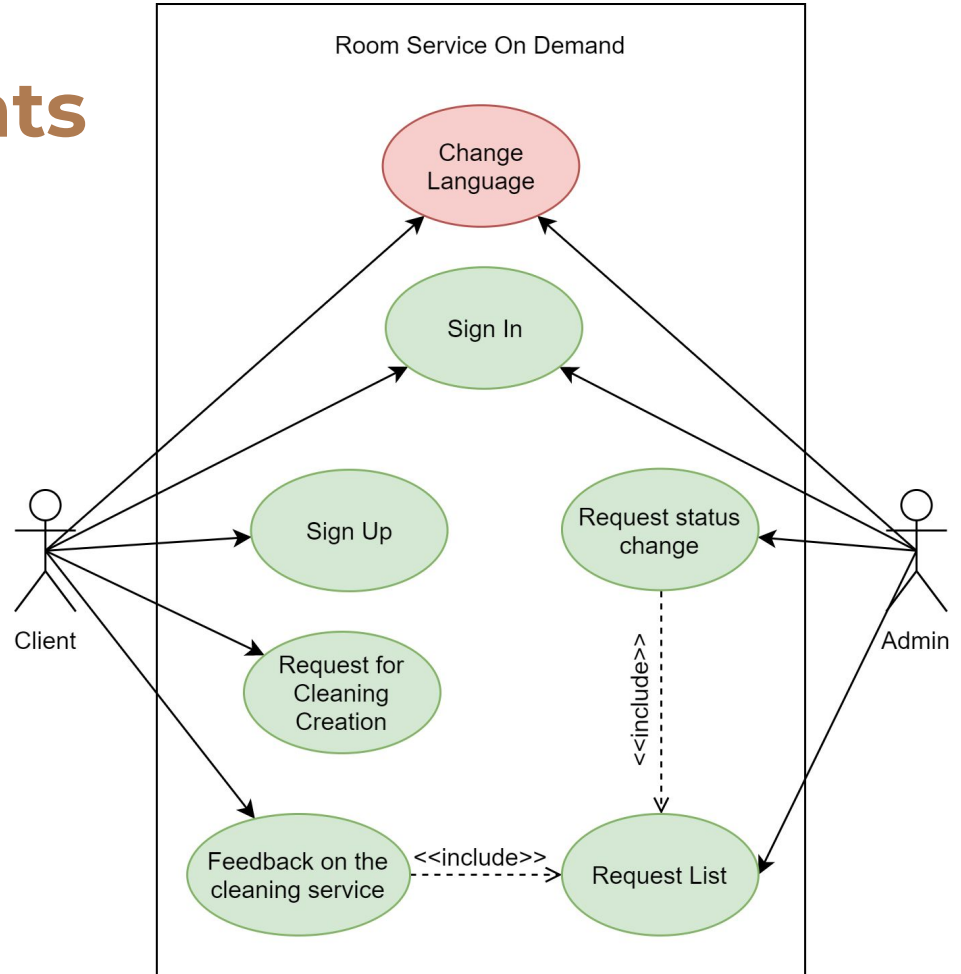

Demo

Lessons learned

- At the implementation stage requirements still can be incomplete
- It is not possible to plan everything in advance
- MVP can be used to proof that solution you provide works

Thank you!
